

BBA specializes in the detection, diagnosis and rehabilitation of hearing and related disorders.

Our Services Include:

Advanced Diagnostic Hearing Evaluations

It is suggested that you have your hearing tested annually by a certified audiologist. Our audiologists will give you a complete hearing evaluation and recommend the most appropriate follow up care.

Vestibular Testing

Dizziness or vertigo can be caused by a disturbance in a particular part of the inner ear, the vestibular system. Evaluation at BBA with VNG/ENG is used to evaluate our inner ear balance centers and suggest recommendations for patient management.

Custom Hearing Aids

Often hearing loss cannot be medically corrected. Hearing aids are one possible solution to improve this dilemma. New technology allows hearing aids to be adjusted for your specific hearing loss to maximize results. At BBA, it is our philosophy to involve our patients in the decision making process.

Visible Speech

With this state-of-the-art demonstration, potential hearing aid wearers are actively involved in making an informed hearing aid selection. Once the hearing aid is fit, the patient leaves more confident that the hearing aids are adjusted correctly and comfortably.

Aural Rehabilitation

BBA offers aural rehabilitation techniques that focus on reducing the difficulties related to hearing loss and listening. The overall goal is to maximize communication success in everyday environments and difficult listening situations.

Cerumen (Wax) Removal

Excessive earwax accumulation may cause hearing loss. Our trained audiologists are competent in removing unnecessary earwax.

Pediatric Audiology

We provide comprehensive hearing evaluations, hearing aid selections, and hearing aid fittings for children. We believe family counseling and rehabilitation are essential to the future success of each child.

Custom Ear Molds

Our earmolds are custom made for your individual needs. We offer:

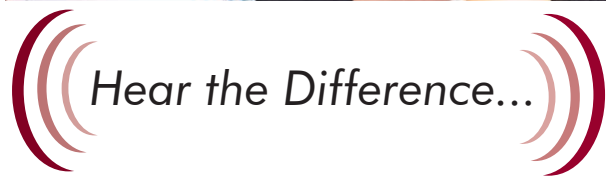

- Hearing Protection Devices Including:
- Musician Earplugs
- Swim Plugs
- Post-surgical ear protection

Video Otoscopy

This new technology allows our audiologists the opportunity to perform a visual examination of the inside of your ear. A small camera is directed into the ear canal and the image is displayed on a monitor.

Community Education

The audiologists of BBA are committed to promoting hearing healthcare in the community. Please ask us about coming to speak to you and your organization. We are available to provide hearing screenings and presentations as well as product demonstrations.

Hear the Difference...

Over 28 million Americans are affected by hearing loss, and Birmingham Bloomfield Audiology is here to help. We are proud to offer a wide range of high quality products and services designed to assist those with hearing impairments. Just one visit and you will see that Birmingham Bloomfield Audiology truly cares about making a difference.

Our products and services are designed to help you and millions of Americans cope with the symptoms of hearing loss.

Kristin Hinderliter Au.D. CCC-A

Dr. Hinderliter is a hearing impaired individual herself and satisfied hearing aid wearer. She understands the frustrations many hearing impaired people encounter.

Her background is managing the Audiology Department of a non-profit organization, assessing hearing loss and fitting patients with amplification. Dr. Hinderliter enjoys working with adult populations helping them to overcome their hearing difficulties.

Eileen Bessega Au.D. CCC-A

Dr. Bessega is experienced working with various age groups, but particularly enjoys assisting children and families. Dr. Bessega concentrates on diagnostic assessment and enjoys a great working relationship with many local Otolaryngologists. Dr. Bessega is also currently pursuing her research Ph.D. in communication disorders. Her previous work experience was in business management while working in the public sector.

Marianne Fortino, M.A. CCC-A

Marianne is an experienced licensed, board certified audiologist. Her background includes working in several private practice settings as well as busy Otolaryngology offices. She has experience performing diagnostic assessments and fitting patients with amplification.

Denise Cummings, Au.D. CCC-A

Dr. Cummings brings to the Practice a global background, having completed her studies domestically and internationally. She comes to us with 15 years of experience in Audiology. Her background includes work in both hospital and university settings. Dr. Cummings enjoys working with our patients and helping them with their hearing care needs.

Just East of the
Village Knoll Shopping Center
next to National City Bank.

BBA accepts most major insurance carriers, Visa and MasterCard credit and debit cards, and personal checks.
